

Jorge Dominguez

UX Developer

I'm a UX Developer and multipurpose designer with industry experience in startups, mobile apps, and video games. I participate in the development of award-winning projects as well as interactive experiences.

I am keen for a new challenge where my user experience research and UX design background can support a fast-paced and goal oriented team. I have served as a liaison between designers, developers, and business leaders.

ABOUT ME

You will find me riding my bike and taking pictures around the world. I know English, Spanish and basic Japanese.

EXPERIENCE

UX Consultant @ JD Studio (2014 - 2015)

Build, evaluate and test new ideas that are not currently on the market. Either create a completely new service or a revamp of an existing one, all projects got me to iterate through different design concepts and learn more about the users. I have participated in several Startup competitions where I won awards, monetary prizes and training in Chile.

Project Leader, Co-Founder @ Bu Multimedia (2012 - 2014)

Lead teams of up to 6 developers, my responsibility was to supervise all projects, from concept to delivering, ensuring that the quality of the product not only satisfies, but also that the team were on point to meet all requirements. On a daily basis, developing prototypes, presentation with clients and user testing. At the end of my period, I successfully delivered more than 25 web and app services.
